

Documentation Use:

1. General:

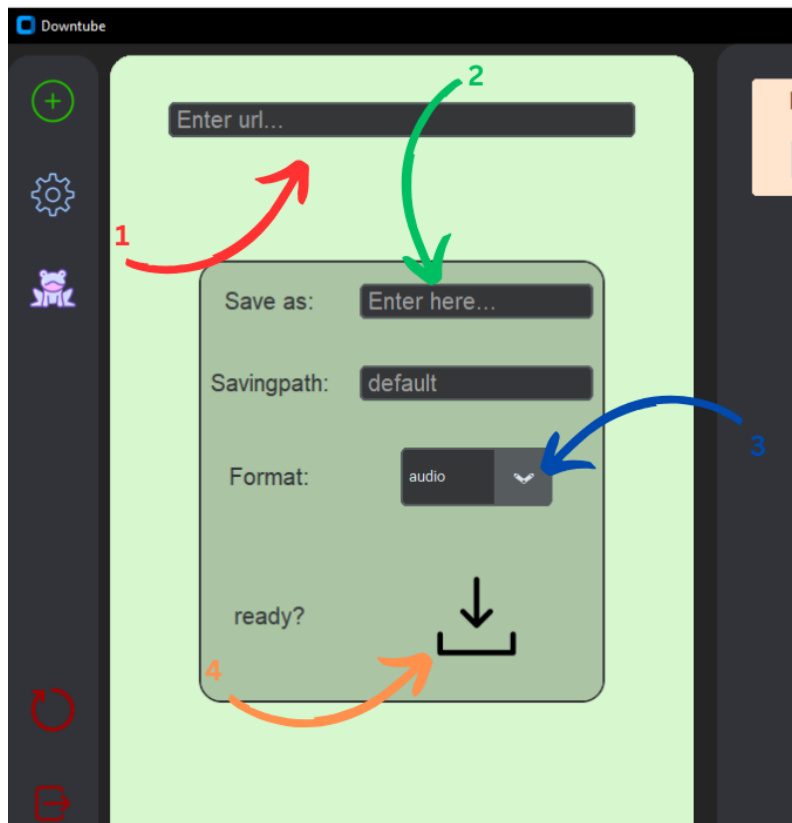

1.1 Menus (sidebar):

- a. Add video/audio
- b. Settings
- c. Customframe
- d. Restart
- e. Exit

1.2 Pageframe location: the pageframes from 1.1 a-c are displayed in this area.

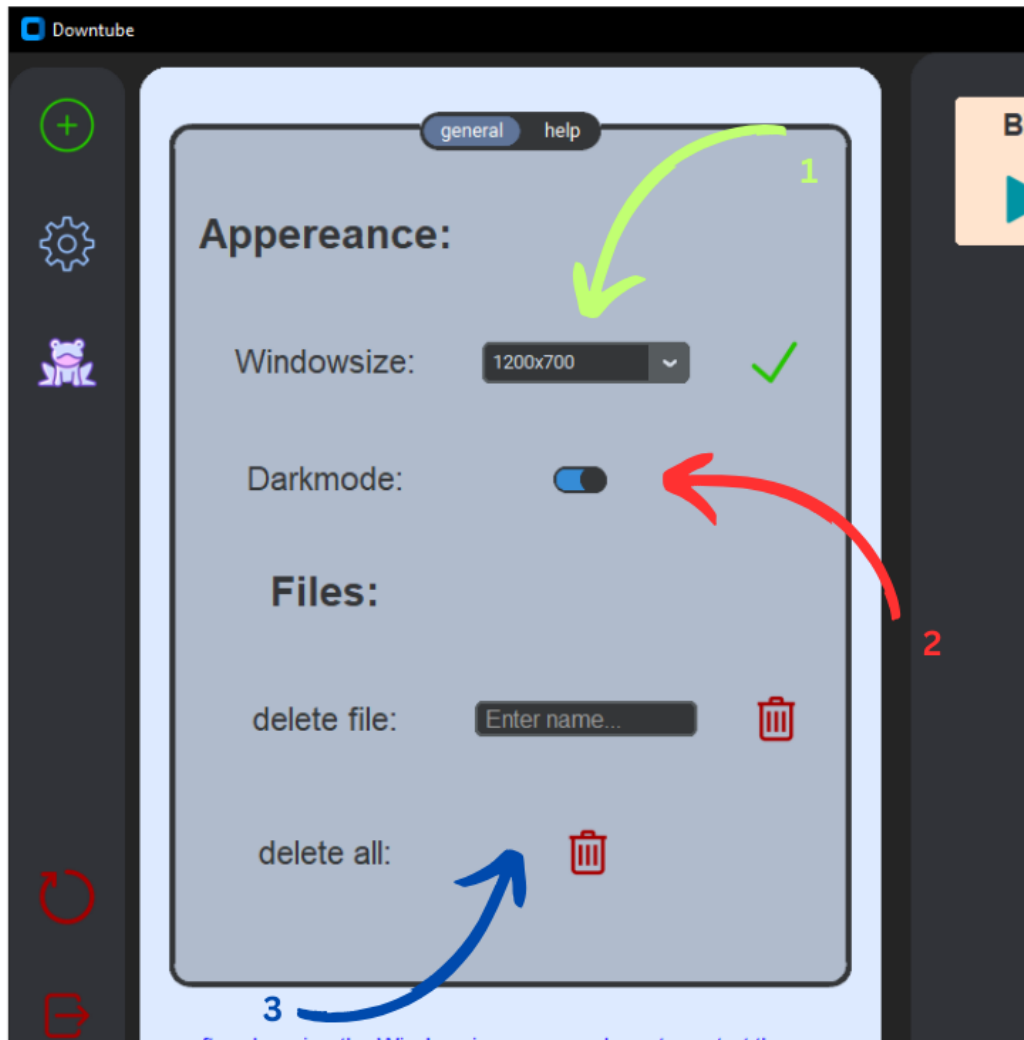

1.3 Fileframe: shows all non-customdownloads

2. Downloadframe (1.1a):

- 2.1 Entry of the URL or link of the YouTube video to be downloaded
- 2.2 Entry of the name under which the video should be saved (max. 20 characters, no special characters except for brackets)
- 2.3 Choice between video and audio, both in *.mp4 format
- 2.4 Download button: download the video/audio (only if all fields are filled in correctly and there is an internet connection)

3. Settings („general“)(1.1b):

3.1 Size of the application, click on the checkmark after selection and restart

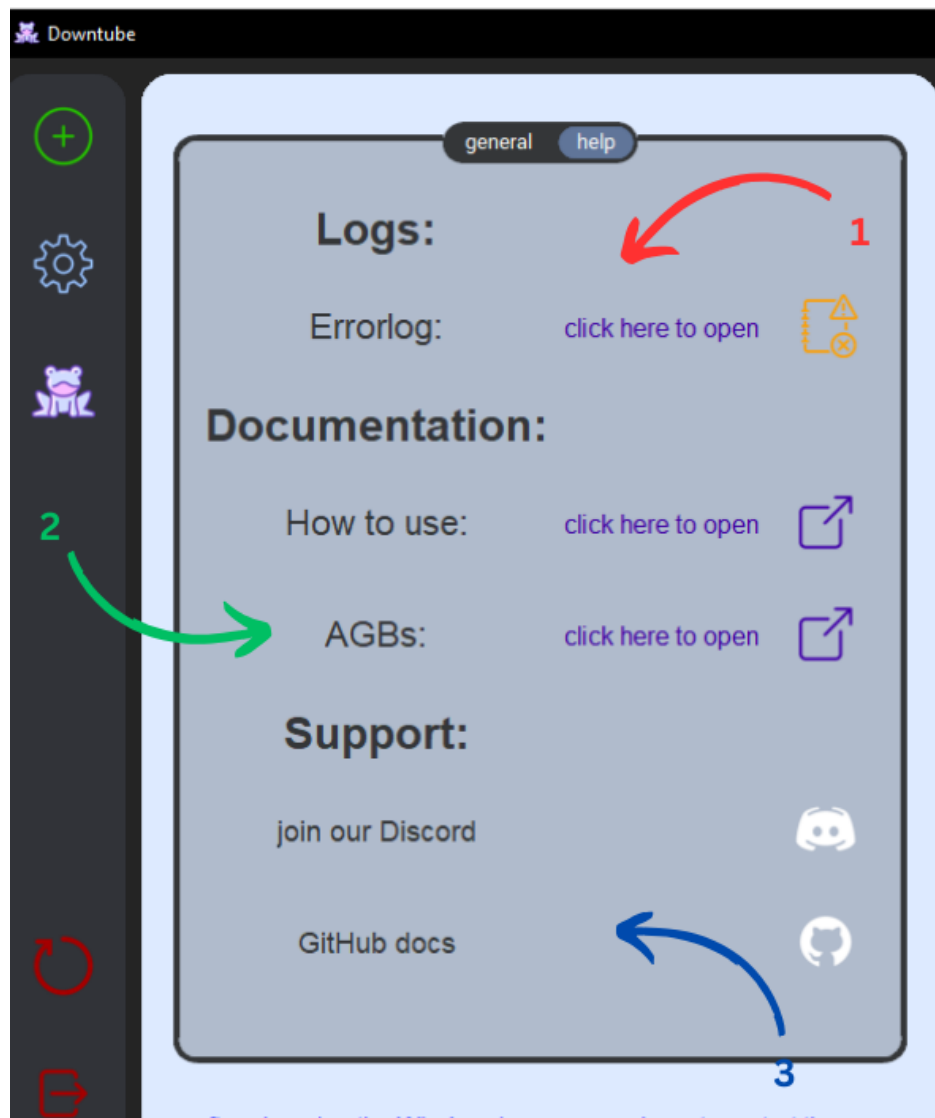

3.2 Mode switch: switch between dark and light mode

3.3 Delete downloaded files:

3.3.1 Single file by entering the name

3.3.2 All files

4. Settings(„help“)(1.1b):

4.1 Open Errorlog: opens the error log as .txt

4.2 Documentation:

4.2.1 Operating aid

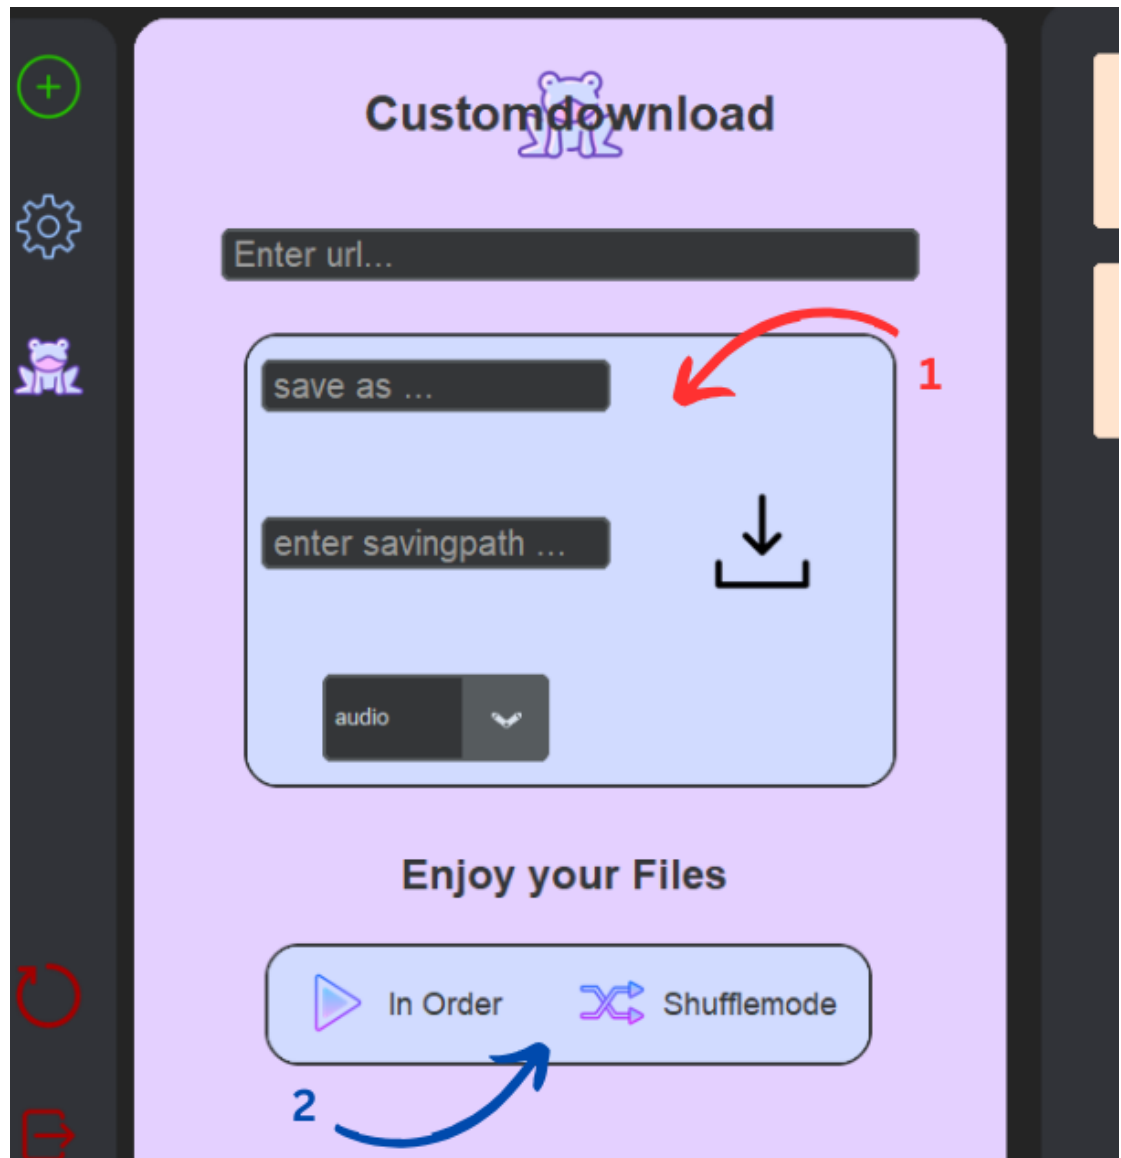

4.2.2 Conditions of use

4.3 Support:

4.3.1 Our Discord server, contact us when having Issues

4.3.2 Github download and documentation

5. Customframe:

5.1 Downloadframe:

Works just like the normal download;

+ However, you can specify the storagepath and there is basically no name limit

e.g.path: C:\Users\<Name des Benutzers>\Desktop

e.g.name: Billie()+#.Jean_more_than_20_chars

- The downloaded files that are not in the supplied "Download" folder are not displayed in the frame (6.)

5.2 "Enjoy your Files":

Here you can play the downloaded files as a playlist either in order ("In Order") or randomly ("Shuffle Mode").

6. Fileframe:

5.1 The fileframe contains all (non-custom) downloaded files and lists them in 3 columns.

5.2 Clicking on the play button opens the file in an external media player.
